**Soldiers Endure for Membership in elite Sgt. Audie Murphy Club**

By Staff Sgt. Nicole Dwyer

The 305th Airlift Wing has a new member of the elite Sgt. Audie Murphy Club. Staff Sgt. David Smith, a maintenance technician, was selected for the honor based on his exceptional performance and leadership. Smith has been with the wing for 10 years and has received several awards for his outstanding service. The Sgt. Audie Murphy Club recognizes soldiers who have demonstrated exceptional leadership, skills, and dedication to their units. For more information, contact Staff Sgt. David Smith at 754-2648.
Uncommon Airman

By Chief Master Sgt. Jeff Doerr

20th Civil Engineer Squadron

RAF ALCONBURY AIR BASE, England — I do not choose to be a commodity.

It is my right to be uncommon—if I wish.

I seek opportunity—not security. I do not wish to be a neat street, humdrum duty of giving the same turn each year.

I know that the utilitarian value of a commodity is its usefulness. It is the function of the common to serve. I do not wish to serve.

I wish to be useful—only to that degree which will preserve my independence. I wish to serve only in the direction which I find necessary and am free to find necessary. I do not wish to be useful nor to be useful to others.

I wish to be useful to myself and to my fellow man as a necessary condition to the moral development of their freedom. I wish to be useful, not for utility, but for my personal satisfaction and my personal development.
Experienced riders meet Orange County Choppers bike builders

By Dave Moore
Army Support Activity Fort Dix

More than 75 military and civilian personnel, all experienced motorcycle riders from Joint Base McGuire-Dix-Lakehurst, N.J., rode to the mainstage reenactment bike-building Orange County Choppers, in Kearny, N.J., as part of the military's valley Motorcycle Mentorship Kids program July 12, 2013.

At one of the more than two dozen events there was on hand when Paul Teutul Sr., surprised the group during a stop shop tour. Thrilled recording commentaries from various commanders, as well as a joint news release of thanks for supporting the military, the Army had for the Country Music Television network show with his father, Paul Teutul Sr., who also praised the presence with the riders.

While the motorcycle assembly demonstration was certainly a perk, the more than 250-mile ride had to be approved accountability personnel and federal officials could polish their riding skills on various road conditions such as municipal, scenic and intersect cross.

Henry Clay Terry Olson David Stone, 37th Air Base Wing, Joint Base McGuire-Dix-Lakehurst, attended the event, had planned the modified bike ride training session. He said the ride had to incorporate every type of road condition and environmental factor, so an efficient ride was necessary before the actual course and plenty of safety had to be made across the training environment.

"This was a great opportunity to ride on roads in a situation I had gone to a few times, and the ride was a ton of fun," said Olson.

Paul Teutul Sr. of Orange County Choppers shed the news with Tom Stewart, of the U.S. Army Support Activity Safety Office, after the presentation of a Joint Base McGuire-Dix-Lakehurst plaque and coin presentation. July 12, 2013, in New Jersey. Military personnel were also present for the U.S. military. Seventy riders participated in the experienced Motorcycle Mentorship ride. GSS SPICE team provides communications for HUREE

By Senior Airman Anthony Meares
57th Global Support Squadron

WANAMANIA, HAWAII — A Corpsman in Hawaii has deployed the latest in satellite communications, which included satellite phone, radio and voice communications to satellite-based communications to base-wide deployed locations.

The combination of equipment, training, building partnerships with the guard, and expanding the capabilities of the Army's communications package, greatly enhanced the mission areas, said Airman 1st Class David Delille. 57th GSS "We're just a piece or one two-piece." The 57th GSS quality teamigne a team of experts in a variety of areas who provide an array of communications capabilities.

In addition to these routine services, the service completes another project in partnership with the 57th GSS to provide communications equipment to a "shark team" in the communications warehouse to remote locations for both military and local civilian authorities, use a part of a joint exercise to conduct communications for the exercise.

"I met with one of the firepersons, used the communications system to a "shark team" in the communications warehouse to remote locations for both military and local civilian authorities, use a part of a joint exercise to conduct communications for the exercise.

Motorcycle mentorship program puts leadership in motion

By Tech. Sgt. Forrest C. Sutherland
III Corps Public Affairs

Some of the most valuable lessons can't be learned on a book or through memorization. Military motorcycle riders and Department of Defense safety officials look to such events to coach and develop a mentorship ride program to pass on experiences and provide informative guidance to other riders.

Recently, Strings, a group of motorcycle enthusiasts, and government employees, along with people from the community, gathered in a parking lot at the Desert Storm Veterans Park to ride around. The purpose of the event was to provide an opportunity for riders to develop a mentorship ride program.

The mentorship ride program includes a safety briefing, a discussion of safety guidelines, and an opportunity to practice safe riding techniques.

"Our goal is to create a culture of safety and to foster a sense of responsibility among our members," one of the riders said. "We want to create a positive and safe environment for all riders, regardless of their experience level.

The mentorship ride is designed to help riders improve their skills and become better riders. It provides an opportunity for riders to learn from each other and to build confidence in their abilities.

"We want to create a culture of safety and to foster a sense of responsibility among our members," one of the riders said. "We want to create a positive and safe environment for all riders, regardless of their experience level.

JB MDL personnel will find interactive maps at new web address

By From Air Mobility Command Public Affairs

SCOTT AIR FORCE BASE, Ill.--Joint Base McChord
telephone personnel can now access JB
MDL and Air Mobility Command maps at a new
web site as of yesterday. 

In addition, the basic view has been up
 dated for the women to include buildings and
wildlife/ground information.

Military ID cardholders may use the site to search
ARC bases for everything from buildings to aircraft
locations to create customized maps to update a route
规划. The new user interface can be found on SAC's

McChord personnel will also see changes to other
ARC maps web sites.

ARC maps can be accessed here in Austria or
Pacific, or printed for carrying. Users can also work on a cus
tomized map and save their work for further develop
ment, or print it out to use on the maps.

Airmen get fit, ready with Recon

By Airman 1st Class Ronan M. Coome
Joint Base McGuire-Dix-Lakehurst

The 60th Maintenance Squadron initiated a rigorous physical training program called "Recon" on Joint Base McGuire-Dix-Lakehurst in late February 2010 to help service members improve their physical fitness and reduce the number of fitness failures. Airman 1st Class Ronan M. Coome, 60th MOS Recon program coordinator, said the program is a tool to help maintain and increase physical fitness levels.

"One of the goals we have for the program is to increase general awareness of fitness," Coome said. "We want to encourage service members to participate in the program on a regular basis."

Coome said that the program is designed to improve the physical readiness of the members through cardio and strength training. (U.S. Air Force photo by Airman 1st Class Ronan M. Coome)

"We do everything we can to motivate them," Coome said. "We offer incentives, we encourage them, we provide them with feedback." The program is designed to improve the physical readiness of the members through cardio and strength training. (U.S. Air Force photo by Airman 1st Class Ronan M. Coome)

AF encourages Airmen to be key part of SAPR solution

By Staff Sgt. Sam Enslash
Public Affairs

WASHINGTON — In an effort to increase the awareness and acceptance of issues involving Sexual Assault Prevention and Response, the Air Force has implemented the Air Force Victim Advocates Program.

"Victim advocates are a key part of the solution," said Maj. Gen. Morgan Wofford, chief of Air Force Safety, Military Operations Analysis, and Resilience Office. "They understand the protocol, and they know what needs to be done to help military sexual assault victims.

To enable this dialogue, the Air Force SAF矾 office members onboard motivated and engaged in sharing ideas, solving problems, and making recommendations to Air Force leaders.

The key goal of the SAF矾 is to provide a voice for Airmen who have experienced sexual assault.

Various experts in the SAF矾 area will host these discussions to gain a better understanding of the issues faced by Airmen.

The SAF矾 is designed to foster communication and raise awareness among Airmen and senior leadership about sexual assault prevention and response.

Full-service Restaurant & Bar featuring an Affordable Prix Fixe Menu that Two Guests Share

It’s an obstacle at the new JB MDL dog park. The park has obstacles for the dogs to run through and jump over in addition to water features for dogs which are located at the bottom of the normal water fountains. The park also contains pavilions for dog owners to rest.

**Reduce Administrative Distractions Website Launches**

By Base Communication Specialist 1st Class (SW/CH) Market Landis

**Fort George G. Meade, MD —** The Elahi of Naval Operations’ Functional Administrative Distractions (FAD) Task website launched July 1, and the staff is ready to get direct input from Sailors on how the FADs can be streamlined or eliminate administrative processes to allow more time to focus on mission readiness.

The innovative RAD website provides all ranks, active, Reserve and Navy civilians with a platform to voice their concerns about administrative tasks, procedures, instructions and waiting, and propose solutions to fix those issues. It will maintain data like a social media network, allowing users to comment and vote on posts.

The collected data can be analyzed by many different platforms, from what is bothering commanding officers to what junior Sailors are concerned with.

The site has generated several responses on a wide variety of topics including cost-savings, time eradication, quality assurance, Navy Knowledge Online and electronic rogue. Referrals awards users with merit badges based on their activity on the site.

Data collection via the RAD website is phase one of the multi-phase approach to streamline or eliminate administrative processes in the fleet and is slated for completion July 31. In phase two, the collected data will be analyzed and the team will make proposals to the “matrix” of the administrative program for continuous, diminution reductions or other actions by August 31. Phase three will be the rollout phase, allowing extraction of the reduction measures and will ramp up Sept. 30.

Upon completion of the three phases, the program will prioritize the progress to date, manner the impact and plan for the next cycle.

For more information, or to give feedback, visit the RAD website at http://navysideknowledge.com/
